
Shower Door Installation in Mesa AZ From a Family Glass Shop Since 1986 Plenty of companies will sell you a shower door. Far fewer will measure your opening, cut the glass to fit, carry it into your bathroom and stand behind the work for years afterward. In Mesa, Glassbusters Inc. has been doing exactly that since 1986. The Robinson family started the business on Broadway Road, and nearly four decades later the shop still handles shower door installation for homeowners across the East Valley, along with mirrors, windows and storefront glass. Shower door installation looks simple when it is done well. The door swings or slides cleanly, the seals meet the glass without gaps, and water stays inside the shower where it belongs. Getting there takes accurate measurements, a solid understanding of how your walls and curb were built, and hardware that is anchored into material that can actually hold it. Glassbusters builds each enclosure to fit the opening it is going into, rather than forcing a standard size into a bathroom that was never standard to begin with. The process starts with a free quote by phone. From there a technician visits, checks the opening for plumb and level, and confirms the style you want, whether that is a frameless door, a sliding enclosure, a bi-fold door for a tight space, or frosted glass for privacy. The glass is then ordered and cut for your bathroom, and the install is booked for a single visit once everything is ready.

Glassbusters Inc. | 518 E Broadway Rd, Mesa, AZ 85204 | (480) 994-5855

Customers who have been through the process tend to say the same things in their reviews: the crew showed up when they said they would, the work area was left clean, and the finished door looked better than they expected. Glassbusters holds a 4.8 star rating across more than 430 Google reviews, and the technicians who come to your home are shower door installation CrimShield certified, background checked, insured and trained. Being local also makes the follow up easier. If a sweep needs adjusting a few months after installation, or a hinge needs a small tweak once the house settles, the shop is a short drive away rather than a call center in another state. That kind of access is a big part of why so many Mesa homeowners return to the same family business for mirrors, windows and their next bathroom. If you have a builder grade framed door that leaks, a shower curtain you are tired of looking at, or a bathroom remodel that is nearly finished and waiting on glass, a call to the shop is the easiest next step. Glassbusters is open Monday to Friday from 8am to 4pm at 518 E Broadway Rd in Mesa. Call (480) 994-5855 to talk through your bathroom and get a free quote on shower door installation.

FAQ About Shower Door Installation

How much does it cost to install a sliding glass shower door?

The price depends on the width of the tub or opening, the glass thickness, the hardware and whether an old door needs removing first. Glassbusters Inc. gives free quotes by phone at (480) 994-5855, then confirms the price after measuring your bathroom in person, so the number you approve is based on your actual opening in Mesa, Tempe, Chandler or Gilbert.

What holds a frameless shower door in place?

A frameless door hangs on hinges fastened into the wall or onto a fixed glass panel, and fixed panels are held with clamps or channels. Silicone seals the joints but does not carry the weight. Glassbusters technicians choose anchors to suit what is behind your tile, which is why the door stays aligned for years.

How long does it take a professional to install a shower door?

Most shower doors are installed in a single visit of a few hours once the glass is ready. The custom tempered glass usually takes one to two weeks after the in person measurement. A simple slider over a tub goes in faster than a large frameless enclosure with fixed panels.

How long after shower door installation can you shower?

Most installers recommend waiting around 24 hours so the silicone can cure fully, and some products need longer. Arizona heat and very dry air both affect curing, so the Glassbusters crew tells you the exact wait for the sealant used in your bathroom before they leave.

Is it better to leave the shower door open or closed after a shower?

Leaving it open, at least partly, lets the enclosure dry faster and reduces humidity, which slows mineral spots and mildew. With the hard water found across Mesa and the East Valley, a quick squeegee pass plus an open door keeps glass and seals in good shape for much longer.

How difficult is it to replace a shower door?

Removing the old door is the easy part. The harder work is cleaning off years of silicone, drilling tile or stone without chipping it, anchoring heavy glass and aligning the door so it seals. Tempered glass cannot be trimmed on site, so accurate measuring is essential, which is why Glassbusters measures every opening in person.

How do you remove a single pivot shower door?

The door is supported while the top pivot is released, then lifted off the bottom pin, and the pivot hardware and frame pieces are unscrewed. Holes and old silicone are then cleaned up. Glassbusters handles removal as part of a replacement and can fit a new pivot, hinged, sliding or bi-fold door in its place.

What is replacing glass shower doors in 2026?

Glass is still the most popular shower enclosure, but styles have shifted toward frameless doors, single fixed panels for walk in showers, frosted privacy bands and matte black or brushed hardware. Glassbusters Inc. installs all of these in Mesa homes and can show you which suits your bathroom.

Do I need to measure my shower before calling for a quote?

No. Rough sizes and a description of the shower are enough for a first conversation on (480) 994-5855. If you go ahead, a Glassbusters technician measures the opening at the top, middle and bottom and checks the curb for level before any glass is ordered.

Can a shower door be installed on a fiberglass or acrylic surround?

Yes. Fiberglass and acrylic surrounds are common in Gilbert and Chandler new builds, and they need anchors made for hollow walls and gentle fastening so the shell does not crack. Sliding and framed doors are often a good fit because they spread the load along a full jamb.

Which areas does Glassbusters serve for shower door installation?

Glassbusters Inc. installs shower doors from its shop at 518 E Broadway Rd in Mesa and serves Mesa, Tempe, Chandler, Gilbert, Phoenix and Scottsdale. The office is open Monday to Friday from 8am to 4pm.

Are Glassbusters shower door installers background checked?

Yes. The technicians are CrimShield certified, background checked, insured and trained, and the family owned company backs its installations with a full workmanship guarantee. Glassbusters has a 4.8 star rating from more than 430 Google reviews.
