Unlike traditional gambling establishment games with complicated paytables, Limbo includes a single, main mechanic: gamers select a target multiplier (e.g., 2x, 10x, or even 1,000 x) and position a wager. If the randomly produced outcome meets or exceeds the selected target, the gamer wins. If it fails, the bet is lost.

4. **Struck "Bet":** The round immediately performs, showing the generated result.
5. **Collect or Repeat:** If the result amounts to or higher than the target, the bet is multiplied by the target and paid out. If it is lower, the stake is forfeited.
