

Yes, hydrangeas are appropriate flowers for a marriage anniversary. Their full flower heads make a generous looking gift, and they work well on their own or mixed with other blooms.

Why hydrangeas work

Hydrangeas suit an anniversary because they feel special without requiring an elaborate arrangement. A few stems can fill a vase, while a larger bouquet can make a striking centerpiece for a dinner at home.

They are also a flexible choice. You can pick a color your partner likes, match the flowers to a wedding palette, or choose a plant for someone who enjoys gardening. The most meaningful detail may be a note explaining why you chose them.

There is no need to follow a strict anniversary flower rule. If hydrangeas were part of your wedding flowers, that connection can make the gift especially personal. If not, their beauty is reason enough.

Choosing a color

Hydrangeas come in several colors, including white, pink, blue, purple and green. Choose based on the recipient's taste rather than worrying about a single fixed meaning. Flower meanings vary, and color can carry a personal association that matters more than any traditional interpretation.

- **White:** A simple choice for a clean, classic arrangement.
- **Pink:** A warm option that pairs well with other soft colors.
- **Blue or purple:** A good choice for someone who likes cooler shades.
- **Green:** A fresh looking option that mixes easily with foliage.

For a more personal bouquet, pair hydrangeas with a flower your partner loves. Roses can add a familiar romantic note, while greenery gives the large blooms room to stand out.

Ways to give hydrangeas

A vase arrangement is easy to enjoy straight away. Choose a sturdy vase that supports the stems and gives the flower heads enough space. For a dinner table, keep the arrangement low enough that you can see each other across it.

A wrapped bouquet is another option if you want your partner to arrange the stems. Include a short note and, if you know it, mention a detail such as the color of the flowers at your wedding or a favorite flower you share.

A potted hydrangea can be a good gift for someone with a suitable outdoor space. Check the plant's care label before choosing it, since its needs will depend on the variety and local conditions.

Keeping cut hydrangeas fresh

Put the stems in a clean vase of water as soon as practical. Trim the ends with clean, sharp scissors and remove any leaves that would sit below the waterline. Change the water regularly and keep the arrangement away from direct sun and heat.

If a flower head starts to wilt, check the water level and trim the stem again. Fresh water and prompt care may help, though cut flowers will not last indefinitely.

Questions about anniversary hydrangeas

Are hydrangeas romantic enough on their own?

Yes. A single variety can make a lovely gift, especially in a favorite color. Add a personal note if you want to make the occasion clear.

Can hydrangeas be mixed with other anniversary flowers?

Yes. Their full heads pair well with smaller flowers and foliage. Choose a mix that suits the recipient rather than following a formula.
