The core principle is straightforward: an airplane takes off, and as it gains altitude, a multiplier boosts in real-time.

The goal is easy yet awesome: squander your payouts before the aircraft flies off the screen, crashes, or lacks fuel. If a gamer stops working to squander in time, their stake for that round is lost. It is a game of pure suspense, fast decision-making, and risk management.

How the Game Works: Step-by-Step

Playing Avia Masters for genuine cash is simple, but understanding the mechanics is essential for protecting the bankroll. Here is a breakdown of a basic game round:

1. **Place a Bet:** Before the flight begins, the gamer picks their wager amount within the designated betting window.
2. **Takeoff:** The airplane launches into the sky, accompanied by sound impacts and a rising multiplier meter.
3. **Ascension:** As the aircraft climbs up higher, the prospective payment multiplier grows (e.g., 1.1 x, 2x, 5x, 20x, and beyond).
4. **The Cash Out:** The gamer needs to strike the "Cash Out" button before the round ends. Effective cash-outs instantly award the bet multiplied by the existing worth.
5. **The Crash:** At an entirely random point figured out by a Provably Fair Random Number Generator (RNG), the flight ends.
