Nevertheless, when money is included, your house must earn a profit. This is where the principle of payout odds versus real odds enters play.

Real Odds vs. House Edge

In a theoretical "reasonable" game in between two buddies, if you bet £ 10 on heads, you win £ 10 if you are right, and lose £ 10 if you are incorrect. The real odds are 1:1.

In a gambling establishment setting, your home presents a margin to make sure success.

Function Level Playing Field (Pals) Casino Coin Flip **Likelihood of Winning** 50% ~ 49.5% to 50% (depending on the platform) **Payout on £ 10 Bet** £ 10 £ 9.50 to £ 9.80 **Home Edge** 0% 1% to 5%
