In standard sports, wagering is frequently restricted to match winners or point spreads. In CS2, the complexity of the video game enables for a wide variety of "prop" bets and situational wagers. These markets are created to show the nuances of tactical first-person shooters.

1. Match Winner (Moneyline)

The most simple bet in the video game. One wagers on which team will win the best-of-one, best-of-three, or best-of-five series. It is the standard for all betting techniques.

2. Map Handicap

Due to the fact that numerous CS2 matches are played as best-of-threes, handicaps are common. If a team is a heavy favorite, they might be given a -1.5 map handicap. This means they need to win the series 2-0 to cover the spread. On the other hand, wagering on the underdog with a +1.5 handicap implies they win the bet if they win even a single map in the series.

3. Overall Maps Over/Under

This market concentrates on the length of the series. In a best-of-three, the "Total Maps" is normally set at 2.5. Betting "Over" means the bettor expects the series to go to 3 maps; betting "Under" implies a speedy 2-0 sweep.
