Unlike conventional games where players spin reels or wait on cards to be dealt, Limbo is specified by its simplicity. A player sets a target multiplier (e.g., 2x, 10x, and even 1,000,000 x) and puts a bet. The game then generates a random multiplier outcome. If the created outcome is equivalent to or greater than the gamer's target multiplier, the bet wins. If it falls below, the bet is lost.
