However, calling it a basic wheel-spinning video game would be an understatement. Crazy Time integrates a physical spinning wheel with advanced enhanced truth, random number generator (RNG) multipliers, and four distinct, interactive reward games. The objective is simple: gamers place wagers on the segment of the wheel they think the flapper will arrive at when it stops.

The Core Elements of the Game

- **The Main Wheel:** A huge 55-segment vertical wheel divided into numbers (1, 2, 5, and 10) and 4 perk round symbols.
- **The Top Slot:** A two-reel, one-row slot machine positioned straight above the main wheel. It spins simultaneously with every game round, providing a multiplier to either a number or a perk game.
- **The Live Host:** Energetic speakers drive the pace of the game, interacting with the chatroom and building thriller during perk rounds.

- **The Goal:** Whichever side faces up when the coin lands determines the player's payment multiplier.
- **Rescue feature:** If the multipliers are disappointingly low, a "Rescue Flip" can sometimes be triggered, giving gamers a 2nd possibility at greater rewards.

2. Cash Hunt

A gallery-style shooting game set against an enormous screen including 108 random multipliers.

- **How it works:** The 108 multipliers are shuffled and concealed behind different symbols (like a cactus, a target, or a chef's hat).
- **The Goal:** Players are given a restricted countdown timer to goal and fire a virtual cannon at the sign they think conceals the greatest multiplier. Each gamer can choose a various target, including a specific element to the shared bonus round.

3. Pachinko

- **How it works:** The host drops a puck from the top of the wall. The puck bounces arbitrarily off the pegs before landing in among several multiplier slots at the bottom.
- **The Goal:** Players win the multiplier where the puck lands. If the puck lands on a "DOUBLE" slot, all multipliers at the bottom of the wall double in worth, and the puck is dropped again for possibly huge payments.

4. Crazy Time

The supreme function of the game, taking location behind a massive red door that leads into a surreal, virtual world.

If the wheel stops on a double or triple value, all multipliers on the wheel boost appropriately, and the wheel spins again. This can result in the video game's maximum marketed multiplier of **20,000 x**.
