

Licensed and Insured Plumber in Katy TX Hiring a licensed and insured plumber is not simply a formality in Texas, it is the real difference between a repair that genuinely protects a homeowner and one that could leave them personally [Plumber in Katy TX](#) liable for property damage or unsafe conditions down the road, which is exactly why Gal Plumbing Industries LLC leads with its licensing on every single job. Jason Galvan holds a Registered Master Plumber license, R.M.P. 41065, issued directly by the Texas State Board of Plumbing Examiners, the state's highest plumbing license tier available and a strict requirement for pulling certain permits, including both gas line and water heater installation permits, on any job in the state.

Insurance matters just as much in practice as licensing does. A licensed and insured company protects the homeowner if something unexpected goes wrong during a repair, whether that means accidental property damage or an on-site injury during the work, in a way that an uninsured handyman working off the books simply cannot offer. Unlicensed plumbing work also creates real, tangible risk at resale, since a home inspector or a

buyer's agent can flag unpermitted or improperly documented plumbing work during a real estate transaction, sometimes killing a deal outright or forcing the seller into costly last-minute corrections. Texas requires plumbing licenses to be renewed periodically along with continuing education, which means a currently licensed Master Plumber has stayed up to date with evolving code requirements, unlike an unlicensed worker who may be operating on outdated knowledge from years or even decades earlier in their career. Homeowners are encouraged to ask any contractor directly for their license number before hiring, and a legitimate, currently licensed plumber will provide it without hesitation. Gal Plumbing Industries LLC lists R.M.P. 41065 openly on its website and paperwork for exactly this reason, since transparency around licensing builds trust from the first phone call. Proof of insurance is available on request for homeowners who want documentation for their own records, particularly useful for larger projects where a homeowner's own insurance policy may require confirmation that any contractor working on the property carries adequate coverage before work begins. Ultimately, licensing and insurance are not just boxes to check before hiring a plumber, they are the foundation that makes every other promise the company makes, from flat rate pricing to a satisfaction guarantee, something a homeowner can actually rely on. To work with a fully licensed and insured Master Plumber anywhere in Katy, TX, call or text Gal Plumbing Industries LLC at (832) 906-1141 to schedule an appointment.

Gal Plumbing Industries LLC Address: 2034 Oakwell Ln, Katy, TX 77449 Phone: (832) 906-1141 FAQ About Plumber in Katy TX How much does a plumber cost in Katy, TX? Minor repairs like a leaky faucet or a single clogged drain typically run in the low hundreds, while larger jobs such as a water heater replacement or a partial repipe cost more depending on materials and access. Gal Plumbing Industries LLC quotes every job with upfront flat rate pricing before work begins, so there is never a surprise once the invoice arrives, and free estimates are available for most residential and commercial jobs. Why is my water heater failing faster than I expected in Katy? Katy draws its water from the Gulf Coast aquifer, which carries a heavier calcium and magnesium load than many other regions, and that hard water accelerates scale buildup inside a tank. Gal Plumbing Industries LLC recommends annual flushing and, for homes that want a longer-term fix, a whole-home water softener to slow the process across the entire plumbing system. Is a tankless water heater worth the extra cost in Katy? For homeowners planning to stay long term, tankless systems often pay for themselves through lower energy costs and a longer lifespan, typically fifteen to twenty years compared to eight to twelve for a standard tank. Gal Plumbing Industries LLC evaluates existing gas line capacity first, since many Katy homes need an upgrade before a tankless unit can be installed to code, and currently offers a discounted \$185 tankless flush for existing owners. Do I need a permit for a water heater installation in Katy? Yes. The City of Katy, along with Fort Bend and Harris

County, requires a permit and inspection for water heater installations and replacements, gas or electric. Gal Plumbing Industries LLC pulls these permits directly on every job under Master Plumber Jason Galvan's R.M.P. 41065 license, since skipping this step creates real risk at resale when a home inspector flags unpermitted work. What causes sewer line problems in Katy homes? The area's heavy clay soil expands and contracts significantly with rainfall and drought, which cracks and misaligns sewer pipe joints over time, especially in homes built in the 1980s and 1990s. Tree root intrusion from mature landscaping is another common cause. Gal Plumbing Industries LLC always starts with a camera inspection to confirm the exact cause before recommending trenchless or traditional repair. How often should drains be professionally cleaned in a Katy home? For most households, a professional check every year or two is enough, but restaurants and homes with a history of recurring clogs benefit from more frequent hydro jetting to clear the mineral scale that Katy's hard water leaves behind. Gal Plumbing Industries LLC offers recurring maintenance scheduling for commercial kitchens throughout the Katy area. What does R.M.P. mean next to a Texas plumber's name? R.M.P. stands for Registered Master Plumber, the highest license tier issued by the Texas State Board of Plumbing Examiners, requiring years of documented journeyman experience plus a separate state exam. Jason Galvan of Gal Plumbing Industries LLC holds R.M.P. 41065, which allows the company to pull gas and water heater permits directly rather than relying on outside licensed help. Is emergency plumbing available on weekends and holidays in Katy? Yes. Gal Plumbing Industries LLC answers calls 24 hours a day, every day of the week including holidays, with the same upfront flat rate pricing used on any weekday appointment. Burst pipes, sewer backups, and failed water heaters are prioritized for same-day dispatch whenever possible. How does Katy's clay soil affect home plumbing? The region's expansive clay soil shifts noticeably with seasonal rainfall and drought, putting ongoing stress on buried water and sewer lines and on pipe joints running beneath a home's foundation. This movement is a leading cause of slab leaks and cracked sewer lines in homes more than fifteen to twenty years old, which is why Gal Plumbing Industries LLC often recommends flexible PEX piping when replacing older, more rigid materials. What service area does Gal Plumbing Industries LLC cover? Gal Plumbing Industries LLC serves Katy, Cinco Ranch, La Centerra, Fulshear, Sugar Land, Richmond, Rosenberg, Mission Bend, Cypress, Tomball, and West Houston, spanning ZIP codes across both Fort Bend and Harris County. Every address in this footprint receives the same licensed workmanship, upfront flat rate pricing, and 24 hour emergency availability.
