What is Mystery Mines?

Mystery Mines is a digital adaptation of timeless grid-based mine-clearing mechanics, updated for the online video gaming era. At its core, the game presents a grid of covert tiles. Underneath these tiles lie two types of objects: benefits (multipliers) and dangers (mines).

The gamer's goal is easy: reveal as many multipliers as possible without triggering a hidden mine. Each time a player effectively uncovers a reward, their potential payment increases. 2. The Multiplier System

Every time a safe tile is clicked, the player's "balance" or "win potential" boosts. The more mines you select to position on the board at the start, the greater the multiplier rewards end up being for each safe tile exposed.

3. The Cash-Out Feature

This is the heart of the game. Anytime after revealing a tile, a gamer can pick to "Cash Out." This puts the existing winnings into their balance. If a gamer strikes a mine, the game ends instantly, and all present development is surrendered.
