What is Aviator?

Aviator is a social multiplayer crash game. The core principle is deceptively simple: an airplane takes off, and as it ascends, a multiplier boosts. Gamers place a couple of bets before the round begins and need to hit the "Cash Out" button before the aircraft flies away. If they cash out successfully, they win their bet multiplied by the existing coefficient. If the airplane flies away (crashes) before they squander, the bet is lost.

Unlike traditional slots where the result is determined entirely behind the scenes by a Random Number Generator (RNG) spinning invisible reels, Aviator puts the aspect of timing directly into the player's hands.

- *How it works:* Players established Auto Cash Out at low multipliers, such as 1.20 x to 1.50 x, and location smaller bets.
- *Objective:* To accomplish regular, little wins that steadily develop the bankroll. The downside is that a single unanticipated 1.00 x crash (where the plane flies away right away) can clean out several previous gains.

- **The Dual-Bet Strategy:**

- *How it works:* Players position two bets all at once. The very first bet is set to auto-cash out at a moderate multiplier (e.g., 2.00 x) to secure an earnings or break even. The 2nd bet is left to run by hand for a higher, riskier multiplier (e.g., 10x or greater).
- *Goal:* Balancing safety with the adventure of going after an enormous payout.

- **The Martingale System (Use with Caution):**

- *How it works:* Doubling the bet after every loss, with the intent of recuperating all previous losses plus an earnings when a win lastly takes place.
- *Goal:* Mathematically recovering losses, though this requires a large bankroll and can rapidly hit table limits.
