A lot of CSGO roulette sites operate on a wheel divided into colored sectors-- typically **Red**, **Black**, and **Green** (or often customized themes matching the game's visual, such as Counter-Terrorist blue and Terrorist yellow/orange).

- **Red & Black:** Usually pay out at 2x the original bet.
- **Green:** An uncommon hit, typically paying at 14x (or often greater depending upon the particular platform's guidelines) due to the fact that it occupies fewer sections on the wheel.

1. **Account Integration:** The user visits a trusted third-party CSGO gambling site and logs in utilizing their Steam qualifications through OpenID.
2. **Deposit Skins:** The gamer transfers skins from their Steam inventory to the platform's bot inventory. The platform values the skins and credits the user's on-site wallet.

3. **Place Bets:** Using the on-site balance, the gamer selects chips and places them on Red, Black, Green, or particular number sections before the betting timer ends.
4. **The Spin:** The digital wheel spins, and a tip lands on a specific color/number.
5. **Payout or Loss:** If the gamer's prediction matches the result, their balance is credited with the payouts. If not, the stake is lost.
6. **Withdrawal:** Successful gamers can use their balance to buy different skins from the site's market and withdraw them back to their Steam inventory via a trade deal.
