## What Are CS: GO Cases?

A CS: GO case is a locked container that can be opened to expose a random skin. Gamers get cases either by leveling up or by purchasing them from the Steam Community Market. Each case includes a pool of skins, ranging from consumer-grade (Mil-Spec) to hidden (Covert) and, in some instances, rare knives or gloves. The case itself is a tradable product; its worth changes based on scarcity, need, and the desirability of its contents.

## Why Some Cases Become Rare

Several factors add to the rarity of a case:

**Factor**Explanation **Limited-Time Availability**Cases released throughout particular operations or occasions are removed from the drop swimming pool when the event ends. **Low Drop Rate**Some cases were never part of the regular rotation, making them scarce from the start. **Ceased Content**When a case is retired, brand-new copies stop entering the marketplace, maintaining existing supply. **Historical Significance**Early cases (e.g., the very first weapon case) carry fond memories and historical worth. **Neighborhood Perception**High-value items (rare knives, hidden skins) inside a case increase its desirability, driving up demand.
