

A Banned Site Re-indexed By Google and MSN Live within

A Banned Site Re-indexed By Google and MSN Live within 24 hours – EASY! So it seems it is possible and over at <http://www.omg-1.com> the experiment is proving itself. The question was 'Can we take a banned site – No pages indexed in google, yahoo or live and can we give it life and PR rank?' Well it took 2 days for a banned domain to enter the MSN Live and the Google Indexes. Now that's fast. But how was it done? Actually the website is set up as a tutorial on how to succeed with SEO search engine optimization. It is a step by step guide to scoring in the SERPs ranking. Just take a look at all the free tools offered all over the internet that practically force the search engines to index you. Take a hint and follow the links on this site, they take you to amazing free optimization tools. So here are the basic steps that got this domain re-indexed after being banned. 20 September 2007 – 1. Added content- [index.php](#) [experiment.html](#) [report.html](#) [paid-directories.html](#) 2. Put together an article about the 'Website Directory Submission Experiment' 3. Submit the article to [digg.com](#), please if you are a member please then digg this story! 3. Wait as long as I can to submit our article below to 640 **seo company in punjab** Article Directories with Article Submitter. I want this website submission experiment webpage to be indexed by google first! This will secure that <http://www.omg-1.com> is the original source article and then we will not go into the googles supplements index. We do not want google to assume an articles site which we submitted to is the article source. Make sure you get your articles into the big article directories! 4. Continue to submit to the web directory database, placing the site into eg. <http://www.webdirectory.za/business/internet/promotions/> 5. SEO TECHNIQUES – Placed TARGET="BLANK" on all outgoing links I have so many outlinks to very reputable sources. It is smart to keep people on your site, so let them view your suggested outgoing urls, but always leave your site page open. I even placed TARGET="BLANK" on affiliate links such as Website Submitter Article Submitter Then I went ahead and placed up meta tags with an off beat title to the site <.title>That is only 10c for a permanent link pointing to your website!<.title> its actually a one line sales pitch. In the description i just cut a block of text out of my main body <.meta name="Description" content="We will hand submit YOUR site to 2000 FREE DIRECTORIES for \$200 US That is only 10c for a permant link pointing to your website! Compare that with adwords SEO search engine optimization is link building." /.> and pasted it straight in as the meta description. I also use this description across all directory site submissions and article site submissions. Also FORCE GOOGLE to visit your site in every way possible 1. Reindexation request.

2. ADD URL. 3. Place AdSense. 4. Place a google search form on your site. 5. Set-up adwords campaign and force google to scan your sites keywords! How? Use the campaign keywords tool and select the option 'Site Related Keywords' Here is what Google scanned, so we can see an insight into what Google thinks about this site, and it's

a perfect result! 5. Setup an Adwords Campaign using the suggested keywords, create some Adwords Adds. I have posted my Adds below! 6. I added the very important OnlyWire button 7. Place <http://www.omg-1.com> to these directories ASAP! 8. Free email subscription service set up on the site for you to sign up to receive our SEO strategy techniques and discounts. 9. Placed a free translation script on the site to cater for foreign language visitors. 10 x the pages to index for the engines. PS. please note that we are already indexed in Google and MSN Live after one day, 20 September 2007. Will it last? Probably not as we will be indexed but now categorized and themed and adjusted within the SERPs. So we will come and go – but indexed for two major engines within two days is very good!
