If you run a home service business in Spring, your website needs to do one job well, help turn local visitors into real phone calls and form leads. For many contractors, that means a site that works on mobile, loads the right information fast, and makes it easy for someone to reach out without hunting around.

That is the idea behind **Scalable Websites**. Based in Montgomery, TX, the company builds and manages mobile-first websites for contractors, home service businesses, and local small businesses across Montgomery County and greater Houston, including Spring, The Woodlands, Conroe, Tomball, Cypress, and Houston. It is a veteran-owned company founded in January 2025, led by owner Preston Toor.

For contractors comparing options for **contractor website design**, **small business website design**, or a **website redesign**, simple monthly pricing can make the decision easier. Instead of trying to sort through a long list of extras, you can start with a plan that fits your business and keep the basics covered from day one.

What a contractor website needs from the start

A contractor website should not feel complicated. It should answer the questions people already have when they land on the page. Can I call now? Can I trust this company? Do they serve my area? How do I request a quote?

Every site from Scalable Websites includes the features most contractors need to handle those basics:

- Click-to-call
- Google reviews shown on the site
- Custom lead forms with instant text and email alerts
- On-page SEO from day one
- Hosting and security

Those are practical features, not fluff. A click-to-call button matters because many customers are on their phones. Google reviews on the site help people quickly see your reputation. Custom lead forms with instant alerts help you respond faster when someone reaches out. On-page SEO from day one helps the site start with a solid foundation. Hosting and security are included, so the website is managed as part of the plan.

For contractors in Spring looking at **web design Montgomery TX** or **web design The Woodlands**, the real value is having a website built around how local service businesses actually get contacted.

Simple monthly plans without the usual confusion

Monthly pricing is often easier to budget than a large scalablewebsites.com web design montgomery tx upfront website bill. Scalable Websites offers three plans, each with a six-month minimum, then month-to-month.

The Starter plan is $95 a month and is built as a single-page site. The Growth plan is $195 a month and includes 3 to 5 pages, missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics. The AI Enhanced plan is $295 a month and includes 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations.

Every plan also includes a 30-day money-back guarantee on signup. After 36 months, the client owns the site. There is *web design montgomery tx* also a free design refresh every 36 months.

That structure is straightforward. If you are a smaller contractor who just needs a clean web presence and a way to capture calls and quote requests, the Starter plan may be enough. If you need more pages and added tools to stay on top of leads, Growth gives you more room. If your business needs a larger site with blogging and priority support, AI Enhanced offers that next step.

Website redesign and maintenance for busy home service businesses

A lot of contractors do not need a website built from scratch. Sometimes they need a **website redesign** because the current site is dated, hard to use on a phone, or not set up to capture leads clearly. Other times, the site itself is fine, but nobody is keeping up with updates and security.

That is where ongoing **website maintenance** matters. Scalable Websites provides unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For a busy contractor, that can remove a lot of the usual website headaches.

Instead of chasing down changes one at a time or wondering whether the site is being monitored, you have a setup built for ongoing management. If your business adds a new service, needs copy updated, or wants to adjust a lead form, those update requests are part of the service.

This is especially useful for trades where schedules are already full. The company works with roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, general contractors, and more than 30 other trades. That focus on home service businesses matters because the needs are different from a general brochure site.

Local service matters in Spring, Montgomery, and The Woodlands

When you are choosing a **website designer Montgomery TX** businesses can meet with in person, local matters. Scalable Websites is a service-area business, not a walk-in office, and meets clients in person across Montgomery County and greater Houston. That includes Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

For contractors in Spring, that means working with a company that understands the area it serves and the kinds of businesses it builds for. The team brings 10+ years of experience and 200+ websites built for home service businesses. It also holds a 5.0-star Google rating.

If you are comparing options for **web design Montgomery TX**, **web design The Woodlands**, or a contractor-focused website in Spring, the biggest thing to look for is whether the website is built to support calls, form fills, and ongoing updates without turning into another project you have to manage yourself.

That is the practical appeal of Scalable Websites. The plans are simple, the websites are mobile-first, and the support is built around the needs of local contractors and small businesses.
