The Tower betting game is a vertical-scrolling, multiplier-based wagering game. The core visual idea is simple: the player guides an avatar or makes sequential options to climb up a multi-level tower.

At each level of the tower, the player must pick one of numerous concealed blocks or courses.

- **Failure:** Selecting a "mine" or trap lead to an immediate loss of the current bet.

Gamers have total control over when to squander. They can pick to gather their payouts after just one effective action or push their luck higher up the tower for huge multipliers.
