1. How Case Battles Work

A case battle is a short, head-to-head match where 2 (or more) gamers open the very same CS: GO case concurrently. The gamer who obtains the better skin wins the opponent's products. The process follows 3 standard steps:

- 1. Select a case**-- Players select a particular weapon case (e.g., The Kill Box, Clutch Case, or Operation Broken Fang).
- 2. Location a stake**-- Each participant dedicates a certain number of skins or credits that correspond to the case's price.
- 3. Open the case**-- The platform randomly designates a skin based upon the case's rarity table. The higher-value skin wins the pot.

Understanding the underlying probability model is crucial. Each case has a published rarity distribution (e.g., Blue(Consumer), Purple(Industrial), Pink(Classified), Red(Covert), and Gold(Knife-grade). While the specific chances vary in between cases, the general hierarchy remains constant.

Case Name	Blue (Consumer)	Purple (Industrial)	Pink (Classified)	Red (Covert)	Gold (Knife)
The Kill Box	79.9%	15.9%	3.2%	0.9%	0.1%
Clutch Case	78.6%	16.2%	3.5%	1.0%	0.07%
Operation Broken Fang	80.1%	14.8%	3.3%	0.8%	0.1%
