What is the Aviator Casino Game?

At its core, Aviator is a multiplayer social game developed around an increasing multiplier curve that can "crash" at any minute. Unlike traditional slots where a random number generator (RNG) identifies the result of a static spin, Aviator offers players a sense of company.

The premise is deceptively easy:

1. An aircraft takes off on the screen.
2. As the aircraft climbs higher, the multiplier connected to the gamer's bet boosts.
3. The goal is to cash out before the aircraft flies away (crashes).
4. If a gamer squanders in time, they win their stake increased by the existing coefficient. If the airplane flies away before they cash out, the bet is lost.

The game's visual is deliberately minimalist, reminiscent of early computer graphics, which ensures it runs smoothly on both home computer and mobile gadgets without lagging.
