When a player starts a round, they drop a puck (or ball) from the top of a pyramid-shaped board filled with challenges-- normally pegs. As the disc falls, it bounces off these pegs in a randomized trajectory till it lands in among the slots at the bottom.

Each slot represents a specific multiplier, which identifies the payout for the round. The slots situated toward the center of the board usually provide lower multipliers (and even lead to a loss), while the slots towards the external edges generally provide significantly greater rewards, showing the lower mathematical possibility of the [plinko gambling](#) puck landing there.
