Weapon cases in CS2 are cosmetic containers that hold weapon finishes, gloves, and knives. Presented over a decade earlier, they have actually progressed from simple random drops into digital products traded on the Steam Community Market and third-party platforms.

To open a case, a player needs 2 things:

1. **A Weapon Case:** Acquired through gameplay drops or acquired from the marketplace.
2. **A Cryptographic Key:** Purchased directly in-game or by means of the Steam Market for a basic cost of £ 2.50 GBP.

As soon as a key is used on a case, a roulette-style animation plays, landing on a specific item identified the precise millisecond the server processes the opening.

Methods of Acquiring Cases

- **Weekly Care Package:** Active-duty players who rank up when a week are granted a care bundle where they can choose two benefits out of four alternatives, usually including a weapon case.
- **Random Post-Match Drops:** Players have a chance to receive a case merely by playing on official or community servers (restricted to a few drops each week).
- **The Steam Community Market:** Buying specific cases straight from other gamers.
- **Third-Party Marketplaces:** Platforms where players purchase and offer skins and cases for real-world currency or crypto.

2. Drop Pools: Active vs. Rare (Discontinued)

Valve keeps 2 distinct drop swimming pools for cases. Understanding the distinction is vital for anybody aiming to invest or gather cases.

- **Active Drop Pool:** These cases drop regularly to players throughout weekly drops and post-match benefits. Since supply is continuously increasing, their market prices tend to stay reasonably low (generally under £ 1.00 GBP).
- **Uncommon Drop Pool (Discontinued):** When Valve introduces a brand-new case, older cases are generally transferred to the "uncommon" or ceased drop swimming pool. These cases no longer drop naturally

through gameplay. As a result, their supply dwindles in time as players open them, which frequently leads to significant rate appreciation.
