What is the Towers Gambling Game?

At its core, the Towers game is a variation of the traditional "minesweeper" category popular at modern-day online crypto casinos. One or more of these tiles consist of a surprise trap (frequently represented as a monster, a bomb, or a skull), while the others consist of a safe multiplier.

If the player chooses a safe tile, their overall bet is multiplied, and they can pick to either squander their winnings or proceed to the next row. If they struck a trap, the round ends instantly, and the initial stake is lost.

Key Characteristics of Towers:

- **Adjustable Difficulty:** Players can typically adjust the grid size and threat level before beginning a game.
- **Instant Action:** Rounds take just a couple of seconds, making it a hectic video gaming experience.
