

Your Local 91202 Dentist at Aghbashian Dental Corp

The 91202 zip code covers a central slice of Glendale, including the Verdugo Viejo district where Aghbashian Dental Corp is based, and residents within this specific area often prioritize finding services genuinely close to home rather than traveling across the wider city. Dr. Nova Aghbashian's practice on North Central Avenue serves exactly this local, walkable demand for many patients living and working within the 91202 area. For 91202 residents, having a dental practice within a short drive, or in some cases walking distance, removes one of the more common barriers to keeping up with regular dental visits, since a long commute to an appointment is one of the easiest reasons to postpone or skip a checkup altogether. The Central Ave office's location means this is rarely a factor for patients living locally. Local familiarity also plays a role in how patients discover the practice, and many 91202 residents first hear about Aghbashian Dental Corp through a neighbor, a coworker at a nearby business, or simply noticing the office while running errands in the area, a pattern of organic, local word of mouth that has built steadily over the years. The 91202 area's mix of residential streets and professional office buildings means the practice sees a genuinely broad range of patients, from longtime local families to professionals who have only recently moved into the neighborhood. Residents of the 91202 zip code looking for a dental practice genuinely close to home are welcome to schedule a visit with Dr. Aghbashian's team on Central Avenue. The 91202 zip code has seen a fair amount of new development and residential turnover in recent years, and Aghbashian Dental Corp has adapted alongside this shifting local population, welcoming a steady mix of longtime residents and newer arrivals to the area. Local business associations and neighborhood groups within 91202 have occasionally featured the practice as a recommended local service provider, another small but meaningful source of new patients over the years. The office's continued presence on Central Avenue has become something of a fixture for residents who have lived in the area for a [Dentist Glendale CA Aghbashian Dental Corp](#) decade or more. Local residents are encouraged to stop by or call to learn more about becoming a new patient. Longstanding local patients often bring their own children and grandchildren in as new patients over time. Aghbashian Dental Corp | 1000 N Central Ave #130, Glendale, CA 91202 | (818) 873-0938

Aghbashian Dental Corp Address: 1000 N Central Ave #130, Glendale, CA 91202 Phone: (818) 873-0938 FAQ About Choosing a Dentist in Glendale, CA How much does a dentist visit cost without insurance in California? Costs vary widely depending on the treatment involved and the practice you choose. Aghbashian Dental Corp presents fee-for-service pricing transparently before any treatment begins, so patients paying out of pocket know exactly what to expect. CareCredit financing and in-house payment plans are also available to help spread larger costs into manageable payments. Do any dental plans cover preventive care at 100 percent? Many dental plans do cover routine exams, cleanings and standard X-rays in full when you stay in network, though coverage details vary by plan. Aghbashian Dental Corp works with Medi-Cal, Denti-Cal and a range of PPO plans, and the front desk team is happy to help verify what a specific plan actually covers before an appointment. Is a root canal cheaper than a crown? A root canal on its own is typically less expensive than a crown, though the two are often needed together, since a tooth that has had a root canal usually requires a crown afterward to restore its strength. Dr. Nova Aghbashian's team at Aghbashian Dental Corp walks patients through the full cost of both steps upfront rather than presenting them as separate surprises. Why can a root canal cost as much as 3000 dollars? A bill in that range usually reflects both the root canal procedure itself and the permanent crown placed afterward, not the root canal alone. Aghbashian Dental Corp breaks this down clearly during treatment planning, and CareCredit or in-house financing can help spread the combined cost into more manageable monthly payments. Will a dentist pull a severely decayed tooth? Yes, extraction becomes necessary when a tooth is too damaged by decay to be saved with a filling, crown or root canal. Dr. Nova Aghbashian evaluates each case individually at Aghbashian Dental Corp, always looking first at whether the tooth can realistically be saved before recommending extraction as a last resort. Can a tooth still decay under a crown? Yes, a crown protects the visible part of a tooth but the

natural tooth structure underneath, along with the gum line around it, can still decay if not cleaned properly. Aghbashian Dental Corp checks existing crowns during routine exams specifically to catch this kind of hidden decay before it becomes a bigger problem. What hurts worse, a tooth extraction or a root canal? Most patients report that the extraction site is sorer during recovery than a root canal, since a root canal is specifically designed to relieve the pressure and infection causing pain in the first place. Both procedures are performed under local anesthesia at Aghbashian Dental Corp, and Dr. Aghbashian walks every patient through exactly what to expect beforehand. What is considered the most painful dental procedure? Public perception often points to root canals, though many patients and dentists actually consider impacted wisdom teeth removal more physically demanding during recovery. Aghbashian Dental Corp offers sedation options for more involved procedures, and Dr. Nova Aghbashian's team focuses on managing discomfort proactively rather than leaving patients to simply push through it. What destroys teeth the most? Frequent sugar intake combined with acid exposure is the leading cause of tooth decay, since this combination feeds the bacteria that erode enamel over time. Aghbashian Dental Corp's routine cleanings and exams are designed to catch this kind of gradual damage early, before it progresses into a cavity or something more serious. What drinks damage teeth the most? Energy drinks and sodas, including diet varieties, tend to cause the most damage, since they combine high acid content with sugar or artificial sweeteners that keep bacteria active on the tooth surface. Patients at Aghbashian Dental Corp are given practical, judgment free guidance on reducing this kind of damage during routine visits. What strengthens tooth enamel the most? Fluoride remains the most effective way to strengthen enamel, binding to its mineral structure and helping reverse the earliest stages of decay before a cavity actually forms. Aghbashian Dental Corp's cleanings include this kind of preventive care as standard, part of why routine visits matter even when nothing feels obviously wrong. Which teeth are hardest for a dentist to remove? Impacted wisdom teeth and molars with curved or multiple roots tend to be the most challenging to extract, often requiring more time and sometimes a surgical approach. Dr. Nova Aghbashian's training in oral surgery means Aghbashian Dental Corp handles these more complex extractions in house at the Glendale office, without referring patients elsewhere.
