Valve's Crackdown and Industry Evolution

In action, the industry adapted. Sites shifted from utilizing Steam accounts directly for automatic trading to making use of cryptocurrencies (Bitcoin, Ethereum, GBPT) or peer-to-peer trading systems. More recently, Valve implemented a 7-day trade hang on newly traded items, severely interrupting the instant liquidity that made skin gambling so popular. Regardless of these hurdles, the market continues to adapt, finding brand-new loopholes and technological workarounds to stay functional.
